

Programs At A Glance

Veritas Collaborative offers a continuum of treatment options for children, adolescents, and adults of all genders.

Inpatient

Inpatient Programs

Highly monitored, around-the-clock treatment for patients who require medical stabilization.

Children and Adolescents

- Individualized support from a multidisciplinary team addressing medical, psychological, and nutritional needs
- Therapeutic meals
- Daily intensive individual, group, and community-of-support programming informed by DBT
- 24-hour nursing care
- Family-based treatment (FBT)
- Integrated education coordinated with the patient's home school

Adults

- Individualized support from a multidisciplinary team of medical providers, psychiatrists, dietitians, and psychotherapists
- Therapeutic meals
- Daily individual, group, and community-of-support programming informed by DBT
- 24-hour nursing care
- Family involvement is strongly encouraged

Residential

Residential Programs

Treatment for patients who are medically stable, but require 24-hour behavioral and medical supervision.

Children and Adolescents

- Individualized support from a multidisciplinary team addressing medical, psychological, and nutritional needs
- Therapeutic meals
- Intensive individual, group, and community-of-support programming informed by DBT
- 24-hour nursing care
- Family-based treatment (FBT)
- Integrated education coordinated with the patient's home school

Adults

- Individualized support from a multidisciplinary team addressing medical, psychological, and nutritional needs
- Therapeutic meals
- Intensive individual, group, and community-of-support programming informed by DBT
- 24-hour nursing care
- Family involvement is strongly encouraged

Intensive

Partial Hospitalization Program (PHP)

Structured, intensive treatment for patients beginning their care journey or stepping down from a higher level of care.

Children and Adolescents

- Frequency: Minimum of 30 hours/week
- Structured therapeutic meals and group therapy
- Regular family participation, including FBT, to enhance development of coping and recovery skills
- Psychiatric assessment, medication management, and medical monitoring

Adults

- Frequency: Minimum of 30 hours/week
- Structured therapeutic meals, behavioral exposure groups, and experiential challenges
- Group therapy for development of emotion regulation, behavior change, and relapse prevention skills
- Psychiatric assessment, medication management, and medical monitoring

Intensive Outpatient Program (IOP)

Intensive treatment for patients beginning their care journey or stepping down from PHP.

- Frequency: Minimum of 12 hours/week
- Focused therapeutic group intervention for patients and families
- Therapeutic meals
- Weekly family participation to enhance development of recovery and relapse prevention skills

- Frequency: Minimum of 12 hours/week
- Group-based intervention provides enhanced therapeutic support and symptom interruption
- Therapeutic meals
- Emphasis on recovery and relapse prevention skills

Outpatient

Outpatient Care

For individuals in need of non-intensive eating disorder treatment.

Children and Adolescents

- Personalized treatment plan, including individual and/or family therapy, nutrition, and medical services as needed
- Family-Based Therapy (FBT) from trained providers

Adults

- Personalized treatment plan, including individual and/or family therapy, nutrition, and medical services as needed
- Family and communities-of-support involved in treatment whenever possible
- Multiple group therapy options available

Please Note: Optimal length of stay at each level of care includes achieving adequate symptom management, nutritional rehabilitation, and recovery of weight and health parameters.
